| Doc ID         | POL-MNT-001                                            |
| Version        | 5.0                                                    |
| Effective Date | 2026-01-01                                             |
| Owner          | VP Manufacturing Operations                            |
| Scope          | Plant A (Pune), Plant B (Chennai), Plant C (Ahmedabad) |

## 1. Policy Statement

OEE Star Enterprises maintains equipment through a structured preventive maintenance (PM) program combined with disciplined downtime reason-code logging (DT-00–DT-08) to maximize Overall Equipment Effectiveness (OEE) across all plants.

## 2. Roles & Responsibilities

| Role                      | Responsibility                                                                                    |
|---------------------------|---------------------------------------------------------------------------------------------------|
| Operator                  | Pre-shift checklist, first-line fault logging, immediate supervisor notification for major faults |
| Maintenance Technician    | Execute PM tasks, respond to work orders, perform SOP-defined repairs                             |
| Shift Supervisor          | Approve downtime code entries, escalate DT-01/DT-08 events within 30 minutes                      |
| Plant Maintenance Manager | Own PM compliance rate, review monthly downtime trend reports                                     |

## 3. Downtime Reporting Requirement

Every stoppage exceeding 5 minutes must be logged against a code from the Error\_Code\_Handbook within the same shift. Codes classified Major severity (DT-01, DT-02, DT-08) require a documented corrective action in the CMMS.

## 4. Escalation Matrix

| Severity                    | Escalation Time   | Escalation Path                              |
|-----------------------------|-------------------|----------------------------------------------|
| Minor (DT-04, DT-05, DT-07) | Within shift      | Operator → Maintenance Technician            |
| Moderate (DT-03, DT-06)     | Within 1 hour     | Technician → Shift Supervisor                |
| Major (DT-01, DT-02, DT-08) | Within 30 minutes | Shift Supervisor → Plant Maintenance Manager |

## 5. Incident Filing

Any downtime event exceeding 120 minutes, or any event involving injury or near-miss, must be documented as a formal incident report and filed in knowledge/incidents/ within 24 hours, per this policy and the Safety\_Guidelines document.
